Abstract (en)
[origin: EP0837295A1] The cabinet has a frame (1) injection-moulded in one piece with two sidewalls (2,3) joined together by shaped bars (4-6). The frontal bar (4) has two sections (7,8) joined at an obtuse angle, with the upper section (7) lying in the plane of the rear wall. The bars are joined transversely by stiffeners (9,10) parallel to the sidewalls, leaving large apertures (11,12;13,14) in the back and top of the frame on either side. The lateral parts are laid in the plastic foam insulation before the cardboard covering is fitted to the remaining walls of the cavities.
