Abstract (en)  
[origin: EP0837484A2] A rocker switch operating device for a switch having a contact member (10) supported at a fulcrum point and having an open and a closed position. The rocker switch operating device comprises a rocker member (40) adapted to be supported in a switch body, the rocker member having a contact-engaging member (45) depending therefrom. The contact engaging member has a contact engaging portion for engaging the contact member, the contact engaging portion being supported with respect to the rocker member by at least one resilient hook portion (80:81) whereby the contact-engaging member may pass the fulcrum point to urge the contact member between the open and closed positions. <IMAGE>
