Abstract (en)
[origin: WO9702982A1] A transport vessel (1) comprising pontoons (2, 3, 6) that are attached to each other with flexible fastening means, and a loading platform (4). The vessel (1) is moved with motors (9). The loading platform (4) is arranged to pivot like a seesaw, guided by the weight of the load, with respect to a horizontal axis situated at a distance from the ends of the loading platform (4). With the loading platform arrangement described herein, the vessel (1) can be loaded easily, and due to its flexible structure the vessel can be beached on several different kinds of shores and it moves smoothly for example at rough sea.
