Abstract (en)
[origin: EP0838307A1] The polishing unit is made of a chain belt (3) fitted with polishing discs. The unit can have a pick-up belt and-or a bottle guide and-or a threading device and-or a tensioning device and-or a device for turning bottles about their own axis. Inclined polishing rollers can be provided,. A device measures and controls the pressure ratios relative to the polishing discs and-or polishing rollers which press on the plastics surfaces. Drive motors for the polishing members can be vertical and-or horizontal.
