Abstract (en)

[origin: EP0838557A2] The modular building system uses shaped building blocks (14) fitted between the upright timbers (11) of the timber frame (11,12) on the outside walls of the house, so that the timbers are at least partially covered by the building blocks from the outside. Part of the timber frame of the house may be formed from pre-fabricated timber panels, with all parts of the timber frame pref. joined together without the use of metal fixings.
