Abstract (en)

[origin: EP0839476A2] Modular shelving structure, comprising at least four elements: a rectangular shelf in which the angles obtain an oblique side, each having a downward opened seat; an upright, with square section, in which two diametrically opposed sharp edges, have longitudinally some specular and equidistant punching; a means for supporting a shelf, consisting of a quadrangular conic element, in which at least one side is provided with a male connector for the reciprocal fixing along a seat provided on the shelf; a core positioned annularly to the upright, subdivided in two elements, provided along the internal walls of bodies protruding for being inserted inside of the punching obtained along the tubular upright; an accessory for the orthogonal connection of an analogue shelf, on one side provided with means for the engagement along the edge of a first shelf, on the other one, providing a side provided with male means for the coupling with a corresponding female seat obtained perimetally to the adjoining shelf. <IMAGE>
