Abstract (en)  
[origin: EP0839746A1] The mechanism to transport printed sheets has an operating unit (11) on a pivot mounting at the end of the gripper (10) away from the lever arm (13). It has a swing movement through a coupling between the ends with a link (20) from a crank. The crank is connected to a rotary drive as a step drive unit, to move the crank by 180 degrees .
