Abstract (en)

The invention relates to a method of producing an electrode comprising an electrode structure (3;14) attached to an underlying base structure (1;11), wherein the method comprises the steps of: (a) applying on the base structure (1;11) the electrode structure (3;14) and between said base structure and said electrode structure applying contact filaments (2;12); and (b) joining said base structure, electrode structure and contact filaments together at joints (15) by electrical welding. The invention also includes an electrode produced by the method, an electrolytic cell comprising an electrode according to the invention, and the use of such an electrode in electrolysis. <IMAGE>
