Abstract (en)

[origin: DE19618445A1] The invention relates to an agent and a process for permanent wave of hair in which the keratin-reducing active ingredient is a compound of the general formula (I), in which A is -CH<sub>2</sub>-, C=O-, -S-, -O-, -NR- where R is C1 to C6- alkyl or C1 to C6-hydroxyalkyl, n is an integer from 0 to 3, provided that n is 0 only when A is -CH<sub>2</sub>-, and m is an integer from 1 to 3. The agent waves the hair in a gentle and uniform manner in a pH range of 6.5 to 9.5 which is gentle to skin and hair, and does not cause any allergic and sensitive reactions.
