Abstract (en)

[origin: FR2737130A1] A toy aircraft for use in a confined space, particularly a room, including a model aircraft (1) with an electric motor (11) driving a propeller (19) and means for controlling the model aircraft in flight, a remote control device (2) comprising an electrical power supply (21) and electrical control means for controlling the flight of the model aircraft, and a flexible cable (3) electrically connecting the remote control device (2) to the model aircraft (1) to supply power to the electric motor (11) from the electrical power supply and to connect said electrical control means to said steering means. The wing loading of the model aircraft (1) trailing the connecting cable (3) is $\leq 1.5 \text{ g/dm}^2$, and the flexible cable is attached to the underside of the model aircraft adjacent to the centre of gravity thereof.
