Abstract (en)

[origin: EP0841016A1] Assembly comprises creating a first sub-assembly by joining together an upper (11) which is at least partially supple and an inner sole (13) using nails (15), and then making a second sub-assembly by adding an outer sole (2), which is fixed in place by rivets (18). The second sub-assembly is then joined to the rigid frame (1) by nuts and bolts (5a, 5b). The second sub-assembly can be adjusted relative to the frame by means of a transverse elongated slot (1b) for the front bolt.
