Abstract (en)

[origin: EP0841251A1] Inner and outer closure flaps (16,17) hinged to opposing sidewalls (6,8) both extend right along the interposed sidewall (7) and the sidewalls (5) between the sidewalls have hinged dust flaps (18,19). These flaps are in turn slotted out at the sides (22,23) and are here engaged by the side edges of the inner closure flap. The side edges of the specified flap are themselves slotted out (20,21) to be engaged by the dust flaps. The inside flap at least is indented to at least the material thickness and shaped to correspond to the dust flaps.
