Abstract (en)

[origin: EP0841257A1] The container (1) fill funnel (4) can be fitted onto the container opening (2) and is positively held to the container at the container base (1a) by fastener (6). The base should be tapered to allow the funnel to be plugged into place as an integral part of the base cover (5). The cover plugs onto the tapered base and adapts to container outline. The base should be in funnel form and repeatedly troughed (9), and the mouth end of the funnel is shaped to fit into the container opening. The cover in its turn has round the opening (7) an externally applied arrester (8) itself screwed into the opening of the container.
