Abstract (en)
[origin: EP0841263A1] The folded packet has a box (10) and a cover (11) pivotally connected to the box at its rear face. The cover has a collar (23). The collar front edge (24) is connected to the box so that the collar extends from the box at the collar upper part. The collar front wall (12) defines a cut out (37) which forms a sliding closure with the box front wall. In the area of the cut out, the collar is arranged against the falling closure flap (35). The flap is gripped against the front wall in the closure position of the cover.
