Abstract (en)
[origin: US5935669A] A cover sheet for painting, plastering, cleaning and lacquering jobs consists of a material sheet (10) folded into at least two folding layers (12a-12h) with longitudinally extending folds (11a-11h). A longitudinal edge portion (13) of the material sheet (10) protrudes beyond the other folding layers (12b-12h), an adhesive tape (16) being fastened along the longitudinal edge portion (13) and protruding laterally beyond the longitudinal edge portion (13). The adhesive-free side (18) of the adhesive tape (16) is provided with a cover strip (20) covering the adhesive tape (16). Using a cover strip and an adhesive tape, the desired properties of this combination may be selected from a great variety of possible combinations by selecting the corresponding tapes and strips.
