Abstract (en)

[origin: EP0841785A2] The method involves transmitting data from a meter (1) to an electronic mailbox (8) in a data transmission system (7). The data are temporally stored in the mailbox and retrievable by an authorised user (14). Preferably, the data are retrieved using at least one of an accounting or inspecting or controlling system (14). The transmission is accomplished using a complete data set (2) which includes additional information about the type and condition of the meter.
