Abstract (en)
[origin: WO9705815A1] A process and apparatus to implement the process for the disposal of toilet waste in a relatively small space with low input energy. The process includes the following operations: separating the liquid portion from the solid portion of the toilet waste, disposing of the liquid portion of the waste by drainage, forming a mixture by combining the solid portion of the waste with a quantity of flammable material having structural properties that retain air passages within the mixture, storing the mixture in a chamber (26), and burning the mixture within the chamber (26).
