Abstract (en)

[origin: DE19646845C1] The packaging comprises a flat housing section (2) with holders (6) on one side for the individual objects, and a flat cover section (3) connected to the housing section by a hinge (4). There are fixtures (21,22) to anchor the folded down cover section on the housing section, and locking lugs (13) are located on the side opposite the hinge. The lugs can be operated independently of each other, and can be pivoted between an open and a locked closed position via a film hinge (15).
