Abstract (en)

[origin: EP0843064A2] The fixture has a part (20,30) in a rabbet groove (11). A holder (40) on the fixture works with two opposing groove walls (12) of the groove. A clamp (42) extends along the facing groove wall. In the direction of this wall, the holder has an extending projection, which can be held in the rabbet groove (1). Alternatively, the fixture may have two parts, one (30) fixed, the other (20,60) movable. The movable part moves against the resistance of the holder relatively to the fixed part. The holder may have a friction surface facing the movable part and working in conjunction with it.
