Abstract (en)
[origin: DE19646785C1] The tool has a base element (1) with a handle element (3) on one end and a gripping jaw (2) on the other and first and second slots (5,7) on its outer and inner narrow sides. A guide part (8,9) in the free space in the base element defined by the slots has first (9) and second (8) parts protruding through the outer and inner slots and is adjustable to define the operating width. A lever part (14) with a further grip element is linked to a rotation point. A pressure tool (13) with a shaft held in a through hole is linked to the lever and a single or double sided die is inserted and held between the pincer jaws and the pressure tool.
