Abstract (en)

In DAB, X-PAD of an audio frame may have information associated with the audio frame as a dynamic label. In the case of a music program, the information may be the name of the program, the artist name, a shop name and telephone number of its CD and the like. This dynamic label is used effectively. In response to a user storage request, a dynamic label is stored. This stored dynamic label is later displayed again on a display unit 32.
