Abstract (en)
[origin: WO9747844A2] A window and/or French window for buildings has a casing and at least one leaf with a leaf frame composed of adjacent sections made of wood or plastics, for example. In at least one partial area of the casing, the section that forms the casing has one section part (10', 10c') which is arranged on the outer side of the window or French window and forms a cover, a second section part to be mounted in the window opening and extending up to the inner side of the window or French window, and a third section part (10"', 10c'') which interconnects the first and second section parts.
