Abstract (en)
[origin: EP0844347A1] The key grip or handle (2) has an attached signal transmission and reception unit with the attachment device provided with flexible grooves (13) via which the key grip can be displaced by exerting a force on the grip in the direction of or transverse to the shaft axis. The grip has an approximately U-shaped holding body which contains the attachment device and in which a grip housing is plug-connected to the transmitter and receiver unit.
