Abstract (en)
[origin: EP0844360A2] The window roller blind system has a roller blind (5) to cover the window (3) and a woven mesh blind (7) as an insect screen. The roller blind box (4) and the mesh roll box (6) are behind each other on a line from the inner side to the outer side of the window, with the rolled mesh box between the window and the roller blind box. The woven mesh material and the roller blind are each on rotating rollers (9) in their boxes (4,6) to be rolled and unrolled. The mesh and the roller blind are taken to and from their rollers on opposite sides, with a parallel alignment between them.
