Abstract (en)  
[origin: WO9705799A1] A reusable container (1) for coins or tokens (3) made of mouldable plastic sheet (5). The container comprises a combination of a first sheet portion (11) at least partially moulded to define a substantially semi-cylindrical recess (13); first divider means (21) for dividing the recess (13) of the first portion (11) into at least two compartments (23); a second sheet portion (31) at least partially moulded to define a substantially semi-cylindrical recess (33), and defining a first cover (39) for the container (1); second divider means (41) for dividing the recess (33) of the second portion (31) into at least two compartments (43); a third sheet portion (51) at least partially moulded to define a substantially semi-cylindrical recess (53), and defining a second cover (59) for the container (1); first hinge means (61) pivotably interconnecting the second (31) and first (11) portions; second hinge means (71) pivotably interconnecting the third (51) and first (11) portions; each of said first (39) and second (59) covers being movable between two separate positions, namely an open position and a closed position; and reversible locking means for locking the first (39) and second (59) covers, said locking means being positioned at opposite ends of the recesses (33, 53) of said second (31) and third (51) portions.
