Abstract (en)  
The sun blind is fitted on a roller (9) mounted inside a hollow window frame and with a slit covered by an edge trim attached to the front of the blind. One of the horizontal frames of the window frame is made in two sections (6,7) enclosing a space (8) which holds the roller for the blind. The front slot formed between the upper and lower frame sections is covered by a trim section (11) when the blind is fully retracted. The trim section is attached to the front edge of the blind using a clamp fitting grip (24). The rear of the frame has an access cover (12) to reach the roller and its mechanism. The access cover includes thermal cladding (15). The front trim strip is shaped to match the rest of the window frame and is protected by an overhead lip (16).

Abstract (de)  
Es wird eine Fenstervorrichtung für Bauwerke vorgeschlagen, bei der in einem Querschenkel (2) des Fensterrahmens ein Schutzraum (8) zur Aufnahme einer Markise (21, 22) vorgesehen ist, wobei der Schutzraum (8) nach außen durch eine Deckleiste (11) verschließbar ist, an der der Markisenstoff (22) unmittelbar befestigt ist. <IMAGE>
