Abstract (en)

[origin: WO9746221A1] The invention relates to a cosmetic method for treating and preventing the signs of skin ageing and in particular wrinkles, characterized in that: a) a composition containing at least one retinoid at a sub-irritant dose which is effective for combating skin ageing, in a support which is suitable for topical administration, is applied to the skin once a day; b) a composition containing a higher dose of at least one retinoid, in a cosmetologically acceptable support which is suitable for topical administration, is applied about 10 to 16 hours after the composition mentioned in a). The invention also relates to a combination product containing such compositions.
