Abstract (en)  
[origin: DE19531077A1] The invention relates to a moulded body sintered and/or compacted from metallic powder and provided with at least one working surface. This moulded body may, for example, be a mirror holding plate (2), wherein the working surface is the adhesive surface. The object of the invention is to produce a moulded body which has a surface texture (3) of the working surface, which texture is adapted in an optimum manner to the respective application. The object is attained according to the invention by a moulded body sintered and/or compacted from metallic powder and provided with at least one working surface having a surface texture formed by a plurality of convexities and concavities.
