Abstract (en)
[origin: EP0846438A1] Wet floors are wiped with a tool comprises a handle (1) with a mop holder (2) attached to be end, carrying a flat mop (12) in two halves (11), each on a mop support edge (14) of the holder. The top bars (10) of the two mop halves are positioned at a distance from each other and are each at least 2 cm high (h). When the mop holder is drawn up, the two support edges slope down in opposite directions to allow the excess water to be pressed out in a bucket etc. Preferably, the mop halves extend outwards beyond the support edges which are formed on holder arms which are attached to a pivot axis (4).
