Abstract (en)

[origin: WO9708725A1] Described is a power circuit-breaker (1) including current transformers (13) and an electronic tripping device (2) with a housing (5), the circuit-breaker also including a data store (14) for characteristic values of current-transformer and breaker parameters. The data store (14) is connected via interfaces (18, 19) to the tripping device (2) and to the current transformers (13) and is detachably mounted on the outside of the tripping-device housing (5).
