Abstract (en)
[origin: EP0847952A1] To provide a take-up winder for elastic yarn that can reliably transfer yarn using a simple structure, and that can remove unwanted yarn resulting from yarn-transferring without damaging a package. A take-up winder for elastic yarn comprises bobbin holders 15, 16; a touch roller 3; a traversing device 4; a turret 2; and a yarn guide 7. The yarn guide 7 releases yarn Y wound around a package P from the winding width to reduce yarn tension in order to loosen the yarn Y. When the yarn guide 7, which is located at a yarn-transferring position M, is rotated to wind the yarn Y around an empty bobbin Be and contact is made, elastic yarn Y is reliably wound around the empty bobbin Be. <IMAGE> <IMAGE>
