Abstract (en)

An effect filament yarn production method involves, during drawing, a filament yarn which is not fully drawn (2') in sections and with thick/thin zones, is brought together with an effect filament (8) over its whole length. The filament yarn (2') is fully drawn into an effect yarn (2''). Also claimed is an apparatus with at least one eddy jet (6) or at least one winding spindle with a supply bobbin for the effect filament (8) where the filament are brought together, and a following drawing field for the combined yarn (2').

Abstract (de)

Die Erfindung bezieht sich auf ein Verfahren sowie eine Vorrichtung zum Herstellen von Dick/Dünn- und/oder Farbeffekten in einem Filamentgarn beim Recken. Ein abschnittsweise nicht voll gerecktes Filamentgarn (2') wird auf seine ganze Länge mit mindestens einem Effektfaden (8) belegt, wonach anschließend das abschnittsweise nicht voll gereckte Filamentgarn zu einem Effektgarn voll ausgereckt wird. <IMAGE>
