Abstract (en)
[origin: EP0848134A1] The door has a pair of cooperating door panels (1,2), each provided with an inflatable gas-tight seal (4), cooperating with a frame (3) which has rounded corner edges. The abutting sides of the door panels have rounded corner edges, with packing pieces (8) inserted in the triangular gaps between the door panels and the frame at the top and bottom. The packing pieces are held against the top and bottom sections of the frame by the inflated door panel seals.
