Abstract (en)

Closeable containers (6), positioned on a transporter or on a fixed site, hold the empty gas-bottles (1b) or full gas bottles (1a). Each container has a closure device operated by a drive motor and which shuts up one gas bottle in the holder, and releases the gas bottle. The containers for full and empty bottles are separated. The closure device is operated by a control (12) connected to sensors. The gas bottles are locked to the base-rings of the holders.

Abstract (de)

Die Erfindung bezieht sich auf ein neuartiges Verkaufssystem für Gasflaschen für technische Gase und/oder Gase für die Energieerzeugung und ist gekennzeichnet durch verschließbare Aufnahmen zum Abstellen von leeren Gasflaschen und/oder zum Bereitstellen von vollen Gasflaschen.
