Abstract (en)
[origin: WO9708246A1] A composition comprising a first, second, third and fourth dye, each of which is of formula (1) or a salt thereof, wherein X is a labile atom or group; A and B are each independently an optionally substituted phenylene group; one of R<1> and R<2> is H and the other is sulpho; one of R<3> and R<4> is H and the other is sulpho; R<5> and R<6> are each independently C1-4-alkyl; and the first, second, third and fourth dye are different from each other. The compositions are particularly useful for dyeing cellulosic substrates and benefit from high solubility and build-up properties.
