Abstract (en)

[origin: DE19627031A1] Antibodies (Ab1) directed specifically against HPV (human papilloma virus) proteins (A) are detected in body fluids by: (i) incubating a native, carrier-bound (A) with the sample; and (ii) reacting bound Ab1 with: (a) labelled antibody (Ab2) directed against Ab1; or (b) unlabelled Ab2 and then third labelled antibody (Ab3) directed against Ab2. Also new are (A) made by refolding the corresponding denatured protein.
