Abstract (en)
[origin: EP0849079A1] The drying unit has a rectangular frame (114) supporting a number of heating rails (6,8), each having a main body provided by a section of an extruded hollow profile which is coupled to a heat source. The frame elements (122,124) extending parallel to the heating rails are provided by sections of the hollow profile used for the heating rails, which has ribs on the outside of the frame elements provided with air channels (22).
