Abstract (en)
A vehicle lamp for mounting near a corner of a vehicle so as to be visible over a wide angular range, comprises a reflector (50) with a substantially paraboloidal main zone (52) and a side zone (58) comprising a series of paraboloidal segments (60) having the same focus and axis as the paraboloid of the main zone (52) with a respective step (62) between each pair of adjacent segments. characterised in that only one segment (60) is separated from the main zone (52) by a single step (62), and in that the steps (62) between each pair of adjacent segments are substantially straight and substantially parallel to one another. <IMAGE>
