Abstract (en)

A printer, with printing width (PW) of at least 30 cm printing a toner image on a large substrate, having a width (WS) and a length (LS), including a latent image bearing member having a width (WLI) equal to or larger than the printing width and at least two means for delivering toner are arranged in a staggered configuration around the latent image bearing member and each having a width (WTD) smaller than the width (WLI) of the latent image bearing member. Preferably the latent image bearing member is a photoconductive member. A printer with a shuttle having a swath width of at least 30 cm is also disclosed. <IMAGE>
