Abstract (en)

[origin: EP0849757A2] The housing has two housing shell elements which have opposing free edges at which they are joined together. The front side (17,18) is covered by a covering cap (28). The housing has an approximately T-shaped outer contour with a longitudinal rib (17) connected to a transverse rib parallel to the base surface. One free end of the longitudinal rib forming a sub-section of the front wall (18) is at least partially covered by the covering cap.
