Abstract (en)  
[origin: WO9738364A1] The object of the present invention is to provide a novel system and method, employing an electronically interrogated conformable tag, for the preservation of authenticity of a number of articles containing for example music records, audio and visual cassettes, compact disks, mini disks, CD-ROM's, VCD's, boxes containing cigars, spirits, perfumes, etc., the tag being glued across the sealing edges of these articles. It is another object of the present invention to provide an electronically interrogated conformable tag that may be permanently damaged upon any attempt of its removal by peeling, detaching or cutting, in a system and method for detecting the unauthorised opening of packages. It is a further object of the present invention to provide an electronically interrogated conformable tag that may contain information related to the contents of the package in a system and method for detecting the unauthorised opening of packages.
