Abstract (en)
The present invention relates to a tablet dispensing device (10). The tablet dispensing device comprises tablet restraining means (11) and a filling opening (12). The tablet restraining means (11) is liquid permeable so that a liquid passing through the tablet restraining means (11) and/or the filling opening (12) dispenses the detergent tablet when the dispensing device (10) retains a detergent tablet. The tablet restraining means (11) is a flexible and resilient spring (14) which expands when a tablet is inserted into the dispensing device (10). <IMAGE>
