Abstract (en)
The in-line roller skate consists of a frame (1) with rollers (2, 3, 4, 5), fastenings (7, 8) for a detachable boot (6), and a brake (9) which is actuated by flexing the leg to operate a lever (11). The brake lever has a rear actuating rod (14) connected to it by an adjustable threaded joint with a locknut (15). The rod is located parallel to the back of the boot and is designed to engage with a recess (19) in a stop (16) projecting from it when the boot is fitted. The lever and rod are held in their upper position by a spring (13).

Abstract (fr)
Patin comprenant un châssis (1) équipé de roulettes (2, 3, 4, 5), une chaussure (6) fixée amoviblement sur ce châssis et un frein (9) actionné par la flexion de la jambe par l'intermédiaire d'un levier (11) articulé sur le châssis et présentant, à l'arrière, une tige d'actionnement (14) venant se placer en face d'une butée (16) de la chaussure lors de la fixation de la chaussure sur le châssis. <IMAGE>
