Abstract (en)

[origin: EP0851322A1] The microgenerator has a group of electrically connected coils (20,21) and a rotor (10) with an upper and a lower plate (13,14). The rotor plates are mounted on either side of the coils. The upper surface of the lower plate and the lower surface of the upper plate both have magnetised regions of alternating polarity. During rotation the regions of alternating polarity pass by the coils in succession. The coils are arranged asymmetrically about the axis of the rotor.
