Abstract (en)  
[origin: WO9709046A1] This invention relates to quinine and quinidine compounds which are ligands, in particular, antagonists, of the Calcitonin Gene-Related Peptide ("CGRP") receptor. In addition, this invention relates to the treatment and prevention of disease states mediated by CGRP, including, but not limited to, headaches, especially migraines; non-insulin dependent diabetes mellitus; cardiovascular disorders; chronic inflammation; endotoxic shock; arthritis; allergic rhinitis; and asthma, all in mammals, by the use of quinine and quinidine CGRP receptor antagonists.
