Abstract (en)
[origin: EP0852122A2] The base has flat support elements each with a bearing plate for the mattress and a spring for the bearing plate. Each leaf-spring (9) is supported on two abutments (5) and extends down through between the abutments so that at least some areas of the springs are located between these abutments. The leaf springs have fixing elements (12) by means of which they are fixed on two adjoining abutments. The springs can be formed as strips of elastic plastics material.
