Abstract (en)

[origin: EP0852157A2] The threaded sockets (8) form an anchoring system for fixture of a binding or similar functional component to the snow board body (2). An insert (13) is provided made of a tear-proof material is anchored in the snow board body or in a core (5) of it and has at least one hole (19) in which the threaded socket (8) is anchored. The insert is made of plastic or a corrosion-resistant material, e.g. aluminium or an aluminium alloy. For each threaded socket an insert is provided. All the inserts are connected together by material ribs. At least one insert (13) on a side facing the snow board under side has a union (17) which stands away over the peripheral surface of the insert.
