Abstract (en)
[origin: WO9729261A1] The threaded ground spike with adapter is a fast, simple and reliable securing means for temporarily erected building screens, batter boards, construction fences and the like. The ground spike is forced or hammered suitably deeply into the ground and the supports can be suited to the shape of and adjustable for height on the spike. The spike is removed by unscrewing by means of a counter nut acting against its head.
