Abstract (en)

[origin: CA2232062A1] A presentation assembly (2) comprising a housing (12) and a material web (11) which is capable of being written on and which is wound into a roll (10), the roll (10) being accommodated in the housing (12) so as to be rotatable about the longitudinal axis thereof, the housing (12) being provided with a dispensing slot (13) through which the material web (11) capable of being written on is dispensed from the housing (12) when the roll (10) is being unwound, characterized in that the material web (11) is provided with at least one relatively rough main surface, so that the writing thereon cannot be erased, and with means whereby a part of the material web capable of being written on can be stuck flat to a base. The invention also relates to a material web roll evidently intended for a presentation assembly according to the invention.
