Abstract (en)

[origin: CA2233340A1] The nature and substance of this invention includes a method and an apparatus for displaying information relating to a characteristic of an object which comprises a storage means (70) containing data for displaying images of different kinds of objects and for each kind of object relating to different sizes of each of the kinds of objects; a database (54) containing data relating to different kinds of characteristics in appropriate units of measurement of each of the kinds of objects and for each kind of characteristic relating to different sizes of each of the kinds of objects. The objects (202, 204, 206, 208) may be different kinds of food respectively in different portion sizes, and the characteristics may be respective measurements of nutrients for each food portion size.

[origin: CA2233340A1] The nature and substance of this invention includes a method and an apparatus for displaying information relating to a characteristic of an object which comprises a storage means (70) containing data for displaying images of different kinds of objects and for each kind of object relating to different sizes of each of the kinds of objects; a database (54) containing data relating to different kinds of characteristics in appropriate units of measurement of each of the kinds of objects and for each kind of characteristic relating to different sizes of each of the kinds of objects. The objects (202, 204, 206, 208) may be different kinds of food respectively in different portion sizes, and the characteristics may be respective measurements of nutrients for each food portion size.
